Index by Subject Matter to JFE, Vol. 114
Nos. 1–4, 1992

BLUFF-BODY FLOWS

On the Motion of Solid Spheres Falling Through Viscous Fluids in Vertical and Inclined Tubes, J. A. C. Humphrey and H. Murata, March, 2–11.

On the Laminar Wakes Behind a Circular Cylinder in Stratified Fluids, R. R. Hwang and S. H. Lin, March, 20–28.

Flow Past Circular Cylinder With Different Surface Configurations, Y. C. Leung, N. W. M. Ko, and K. M. Tang, June, 170–177.

On the Organization of Flow and Heat Transfer in the Near Wake of a Circular Cylinder in Steady and Pulsed Flow, D. P. Telionis, M. Gundappa, and T. E. Diller, September, 348–355.

Three-Dimensional Flow Patterns in Two-Dimensional Wakes, G. S. Triantafyllou, September, 356–361.

Experimental Investigation of Uniform-Shear Flow Past a Circular Cylinder, T. S. Kwon, H. J. Sung, and J. M. Hyun, September, 457–460.

Vortex-Shedding From a Circular Cylinder of Finite Length Placed on a Ground Plane, S. Okamoto and Y. Sunabashiri, December, 512–521.

BOUNDARY LAYER AND SHEAR FLOWS

Equilibrium Boundary-Layers—A New Wall/Outer Variable Perspective, L. C. Thomas and S. M. F. Hassani, June, 152–154.

A Comparison of Turbulent Boundary Layer Wall-Pressure Spectra, W. L. Keith, D. A. Hurdis, and B. M. Abraham, September, 338–347.

A Note on a Generalized Eddy—Viscosity Hypothesis, P. Andreasson and U. Svensson, September, 463–466.

Perspective: On the Near Wall Similarity of Three-Dimensional Turbulent Boundary Layers, M. S. Ölcmen and R. L. Simpson, December, 487–495.

Redeveloping Turbulent Boundary Layer in the Backward-Facing Step Flow, J. Y. Yoo and S. J. Baik, December, 522–529.

Some Characteristics of the Vortical Motions in the Outer Region of Turbulent Boundary Layers, J. C. Klewicki, R. E. Falco, and J. F. Foss, December, 530–536.

The Development of a Turbulent Junction Vortex System, F. J. Pierce and J. Shin, December, 559–565.

Experimental Investigation of a Three-Dimensional Boundary Layer Flow in the Vicinity of an Upright Wall Mounted Cylinder, J. H. Agui and J. Andreopoulos, December, 566–576.

COMPUTATIONAL METHODS

Numerical Simulation of Flows Driven by a Torsionally Oscillating Lid in a Square Cavity, R. Iwatsu, J. M. Hyun, and K. Kuwahara, June, 143–151.

A Flux-Split Solution Procedure for Unsteady Inlet Flow Calculations, H. S. Pordal, P. K. Khosla, and S. G. Rubin, June, 198–204.

Simultaneous Variable Solutions of the Incompressible Steady Navier-Stokes Equations in General Curvilinear Coordinate Systems, G. Vradis, V. Zalak, and J. Bentson, September, 299–305.

Study of Branched Turboprop Inlet Ducts Using a Multiple Block Grid Calculation Procedure, A. K. Tolpadi and M. E. Braaten, September, 379–385.

Three-Dimensional Finite-Volume Method for Incompressible Flows With Complex Boundaries, S. Majumdar, W. Rodi, and J. Zhu, December, 496–503.

Numerical Solution of the Incompressible Boundary-Layer Equations Using the Finite Element Method, J. A. Schetz, E. Hytopoulos, and M. Gunzburger, December, 504–511.

An Inverse Inner-Variable Theory for Separated Turbulent Boundary Layers, D. K. Das, December, 543–553.

DIFFUSER FLOWS

Effect of Inlet Flow Distortion on Performance of Vortex Controlled Diffusers, R. K. Sullerey, V. Ashok, and K. V. Shantharam, June, 191–197.

FLOW CONTROL

Effect of Passenger Car's Rear Deck Geometry on Its Aerodynamic Coefficients, J. Katz and L. Dykstra, June, 186–190.

Gas-Solid Flow in a Fluidically Oscillating Jet, G. J. Morris, J. T. Jurewicz, and G. M. Palmer, September, 362–366.

FLOW MEASUREMENTS

Thin Flowing Liquid Film Thickness Measurement by Laser Induced Fluorescence, D. I. Driscoll, R. L. Schmitt, and W. H. Stevenson, March, 107–112.

Application of Digital Moire Interferometry for Mapping Conical Flows, R. Srikanth and E. Rathakrishnan, June, 246–249.

Novel Optical Fiber Installation by Use of Spiral Airflow, K. Horii, Y. Matsumae, K. Ohsumi, X. M. Cheng, S. Kage, and B. Hashimoto, September, 375–378.

Applicability Tests for the Phase Doppler Anemometer for Cavitation Nuclei Measurements, H. Tanger and E. A. Weitendorf, September, 443–449.

FLOW THROUGH POROUS MEDIA

Fluid Flow Through a Porous Medium Channel With Permeable Walls, J. M. Khodadadi and J. T. Kroll, March, 124–126.

Non-Darcy Couette Flow in a Porous Medium Filled With an Inelastic Non-Newtonian Fluid, A. Nakayama, December, 642–647.

FLUID MACHINERY

Pressure Oscillation in the Leakage Annulus Between a Shrouded Impeller and Its Housing Due to Impeller-Discharge-Pressure Disturbances, D. W. Childs, March, 61–67.

Flow Development and Analysis of MHD Generators and Seawater Thrusters, E. D. Doss and G. D. Roy, March, 68–72.

Simulation of Three-Dimensional Shear Flow Around a Nozzle-Afterbody at High Speeds, O. Baysal and W. B. Hoffman, June, 178–185.

Experimental Validation of a Ducted Propeller Analysis Method, M. J. Hughes, S. A. Kinnas, and J. E. Kerwin, June, 214–219.

Simulation of the Strongly Swirling Aerodynamic Field in a Vortex Combustor, S. Nieh and J. Zhang, September, 367–374.

Effect of Density, Size Distribution, and Concentration of Solid on the Characteristics of Centrifugal Pumps, V. K. Gahlot, V. Seshadri, and R. C. Malhotra, September, 386–389.

Quantitative Visualization of the Flow Within the Volute of a Centrifugal Pump. Part A: Technique, R. Dong, S. Chu, and J. Katz, September, 390–395.

Quantitative Visualization of the Flow Within the Volute of a Centrifugal Pump. Part B: Results and Analysis, R. Dong, S. Chu, and J. Katz, September, 396–403.

Numerical Study of the Effects of Longitudinal Acceleration on Solid Rocket Motor Internal Ballistics, J. J. Gottlieb and D. R. Greatrix, September, 404–410.

LDV Measurements in a Centrifugal Slurry Pump: Water and Dilute Slurry Flows, T. Cader, O. Masbernat, and M. C. Roco, December, 606–615.

Optimization of the Parameters for a Rotating, Mixed-Phase Reactor, J. G. Cleland and D. M. Kornfeld, December, 616–620.

Prediction of Rotor Dynamic Destabilizing Forces in Axial Flow Compressors, J. Colding-Jorgensen, December, 621–625.

Low Area Ratio Aircraft Fuel Jet-Pump Performances With and Without Cavitation, M. Marini, A. Massardo, A. Satta, and M. Geraci, December, 626–631.

Some Unsteady Fluid Forces on Pump Impellers, R. S. Miskovish and C. E. Brennen, December, 632–637.

Reaction Forces During Two-Phase Discharges, J. C. Leung, December, 689–692.

FLUID-STRUCTURE INTERACTIONS

On Stability Analysis of a Flexible Cylinder in an Array of Rigid Cylinders, J. Marn and I. Catton, March, 12–19.

Acoustics of Transonic Flow Around an Oscillating Flap, A. S. Lyrintzis and Y. Xue, June, 240–245.

Fluid-Structure Interaction With Cavitation in Transient Pipe Flows, D. Fan and A. Tijsseling, June, 268–274.

Nonlinear Response of Planar Laminar Flow Over a Flat Plate Vibrating in Different Modes, N. K. Venkat and M. Spaulding, December, 577–584.

GENERAL TOPICS

Pressure Drop in Single-Phase and Two-Phase Couette-Poiseuille Flow, A. Salhi, C. Rey, and J. M. Rosant, March, 80–84.

Decay of Temperature Variance in the Presence of Nonhomogeneous Strain, H. R. Rahai and J. C. LaRue, June, 155–160.

Brief Review of Some Time-Dependent Flows, T. Sarpkaya, September, 283–298.

Motion of a Particle Floating on a Liquid Meniscus Surface, K. Katoh, H. Fujita, and E. Imazu, September, 411–416.

The Measurement of Solid-Liquid Contact Angles, K. Katoh, H. Fujita, H. Sasaki, and K. Miyashita, September, 460–466.

JET FLOWS

Prediction of Confined Three-Dimensional Impinging Flows With Various Turbulence Models, T. M. Liou, Y. H. Hwang, and L. Chen, June, 220–230.

Velocity Characteristics of Multiple Impinging Jets Through a Crossflow, J. M. M. Barata, D. F. G. Durao, and M. V. Heitor, June, 231–239.

Some Characteristics of Counter Flowing Wall Jet, R. Balachander, L. Robillard, and A. S. Ramamurthy, December, 554–558.

MULTIPHASE BUBBLY FLOWS

Studies on Cavitation Inception Process in Separated Flows, S. G. Milton and V. H. Arakeri, March, 85–92.

Dynamics of Attached Cavities on Bodies of Revolution, S. L. Ceccio and C. E. Brennen, March, 93–99.

Dynamic Criterion for Cavitation of Bubbles, C. Dugué, D. H. Fruman, J-Y. Billard, and P. Cerrutti, June, 250–254.

Occurrence of Bubbles in a Thin Wire at Low Reynolds Number, K. Sato, June, 255–260.

Simultaneous Cavitation Susceptibility Meter and Holographic Measurements of Nuclei in Liquids, L. d'Agostino and S. I. Green, June, 261–267.

Water Quality Effects on Cavitation Inception in a Trailing Vortex, R. E. Arndt and A. P. Keller, September, 430–438.

A Note on Choking Cavitation Flow Past Bluff Bodies, A. S. Ramamurthy and R. Balachandar, September, 439–442.

Hydrodynamics of Two-Phase Flow Horizontal In-Line and Staggered Rod Bundles, R. Dowlati, A. M. C. Chan, and M. Kuwaji, September, 450–456.

Three-Dimensional Calculation of Bubble Growth and Drop Ejection in a Bubble Jet Printer, A. Asai, December, 638–641.

Freestream Nuclei and Traveling-Bubble Cavitation, R. S. Meyer, M. L. Billet, and J. W. Holl, December, 672–679.

Dynamical Interactions in a Multi-Bubble Cloud, G. L. Chahine and R. Duraiswami, December, 680–686.

MULTIPHASE PARTICLE FLOW

Numerical Simulation of Heavy Particle Dispersion Time Step and Nonlinear Drag Considerations, L.-P. Wang and D. E. Stock, March, 100–106.

Airblast Atomization of Viscous Newtonian Liquids Using Twin-Fluid Jet Atomizers of Various Designs, S. C. Tsai and B. Viers, March, 113–118.

The Magnetic of Basset Forces in Unsteady Multiphase Flow Computations, L. Liang and E. E. Michaelides, September, 417–419.

Numerical Analysis of Gas-Particle Two-Phase Subsonic Free-jets, N. Hatta, R. Ishii, and H. Fujimoto, September, 420–429.

Swirling, Particle-Laden Flows Through a Pipe Expansion, M. Sommerfeld, A. Ando, and D. Wennerberg, December, 648–656.

Particle Dispersion by Vortex Structures in Plane Mixing Layers, F. Wen, N. Kamalu, J. N. Chung, C. T. Crowe, and T. R. Troutt, December, 657–666.

Turbulent Diffusion of Heavy-Particles in Turbulent Jets, A. A. Mostafa, December, 667–671.

Phase Discrimination in Gas-Particle Flows Using Thermal Anemometry, M. L. Ritsch and J. H. Davidson, December, 692–697.

PIPE-DUCT-CHANNEL FLOWS

Inlet Boundary Conditions for Shock Wave Propagation Problems in Air Ducts, R. H. Fashbaugh, March, 58–60.

The Effect of Friction on Flow Distribution in Dividing and Combining Flow Manifolds, P. I. Shen, March, 121–123.

Eddy Correlations for Laminar Axisymmetric Sudden Expansion Flows, D. Badekas and D. D. Knight, March, 119–121.

Viscous Simulation Method for Unsteady Flows Past Multicomponent Configurations, K. Fouladi and O. Baysal, June, 161–169.

Blocked Flow Subchannel Simulation Comparison With Single-Phase Flow Data, A. Teyssedou, A. Tapucu, and R. Camarero, June, 205–213.

Secondary Flow and Hydraulic Losses With Sinuous Conduits of Rectangular Cross Section, Y. Shimizu, Y. Futaki, and C. S. Martin, December, 593–600.

A Power-Law Formulation of Laminar Flow in Short Pipes, M. Sherman, December, 601–605.

The Effect of Blade Manipulator in Fully Developed Pipe Flow, Y. A. Mah, B. C. Khoo, and Y. T. Chew, December, 687–689.

SEPARATION

A Three-Layer Model for Separated Turbulent Flows, U. C. Goldberg, September, 333–337.

A Near-Wall Model for Separated Turbulent Flows, U. C. Goldberg, December, 694–697.

STABILITY AND TRANSITION

Testing of Transition-Region Models, B. A. Singer and P. G. Dinavahi, March, 73–79.

Boundary-Layer Transition in Accelerating Flows With Intense Freestream Turbulence: Part 1—Disturbances Upstream of Transition Onset, M. F. Blair, September, 313–321.

Boundary-Layer Transition in Accelerating Flows With Intense Freestream Turbulence: Part 2—The Zone of Intermittent Turbulence, M. F. Blair, September, 322–332.

The Linear Stability of a Flat Plate Boundary-Layer Approaching a Cylindrical Obstacle, R. E. Spall and M. R. Malik, September, 306–312.

Flow Instability in a Curved Duct of Rectangular Cross Section, A. Belaidi, M. W. Johnson, and J. A. C. Humphrey, December, 585–592.

TURBULENT FLOWS

Bounded Energy States in Homogeneous Turbulent Shear Flow—An Alternative View, P. S. Bernard and C. G. Speziale, March, 29–39.

Turbulence Modeling and Simulation of Atmospheric Boundary Layers, T. W. Abou-Arab and M. A. Serag-Eldin, March, 40–44.

A Frequency-Domain Filtering Technique for Triple Decomposition of Unsteady Turbulent Flow, G. J. Brereton and A. Kodal, March, 45–51.

On Turbulent Flows Dominated by Curvature Effects, G. C. Cheng and S. Farokhi, March, 52–57.

Turbulent Flow Near a Rough Wall, Y.-M. Koh, December, 537–542.

For Your ASME Bookshelf

Multiphase Flow in Wells and Pipelines

Editors: M.P. Sharma, U.S. Rohatgi

This volume contains 16 papers of wide variety focusing on different aspects of problems related to multiphase flow in wells and pipelines. The papers reflect generality of gas-liquid, liquid-solid, gas-solid flows. They include theoretical, numerical modeling, experimental investigation, and state-of-the-art review aspects of multiphase flow.
